

# AXAMENTA

PROGRESSIVE CINEMATIC DARKNESS

## BIOGRAPHY

After releasing the acclaimed concept album “Ever-Arch-I-Tech-Ture” in 2006, a groundbreaking blend of blackened progressive metal and cinematic orchestration, Axamenta quickly became a standout act in the metal scene, earning accolades like “Album of the Month” from Aardschok and playing at Graspop Metal Meeting two years in a row. Their signature movie score sound even made it into 3 Hollywood blockbuster movie trailers. However, the band went on hiatus in 2008, with members pursuing various musical paths.

### **Rebirth and Spires (2022 - Present)**

Reuniting in 2022, Axamenta reignited their passion for storytelling with a bold, evolved sound. Their self-released EP, “Spires”, launched in July 2024 to rave reviews, revisits the eerie universe of “Ever-Arch-I-Tech-Ture” with a modern twist. This 23-minute composition unfolds in seven acts, drawing listeners into an intense, bone-chilling world that merges progressive metal with a haunting, cinematic experience. “Spires” has solidified Axamenta as a force in modern metal, celebrated for its rich musical storytelling and innovation.

### **New Single “Summerhaven”**

Their latest single, “Summerhaven”, brings a fresh sound, inspired by the nostalgia of 80s arcade games and the adventure-horror vibe of Stranger Things. With its retro atmosphere and haunting, melodic undertones, “Summerhaven” explores a unique side of Axamenta, embracing themes of mystery and nostalgia while showcasing their versatility as they venture into new sonic territory.
